SUBJECT INDEX

Ball-milling
differences in the amorphization reaction by mechanical alloying of Ni–Zr resulting from different ball-milling techniques, 119
Brillouin scattering
Brillouin scattering and transmission electron microscopy studies of radiation induced elastic softening, disordering and amorphization of intermetallic compounds, 231
Bulk properties
bulk property measurements for studying solid state reactions, 67

Calorimetry
calorimetry study of the synthesis of amorphous Ni–Ti alloys by mechanical alloying, 171
Chemical disorder
chemical disordering in amorphization, 193
Chemical short-range order
chemical short-range order in dense random-packed models, 385
Chromium
structure and transformation kinetics in spontaneously vitrified Cr–Ti alloys, 317
Collapse
radiation-induced collapse of the crystalline structure, 219
Computer simulation
computer simulation of defect-induced vitrification, 245
Copper
deformation-induced amorphization of $CuTi_2$ microcrystals in an amorphous matrix, 149
Crystallization
crystallization of zirconium-based metallic glasses, 1

Deformation-induced amorphization
deformation-induced amorphization of $CuTi_2$ microcrystals in an amorphous matrix, 149
Differential scanning calorimetry
differential scanning calorimetry studies of solid state amorphization in multilayer Ni/Zr, 353
Diffusion
amorphization by solid state diffusion in granular system, 49
diffusion studies in amorphous NiZr alloys and their relevance for solid state amorphizing reactions, 345
ion beam mixing and radiation enhanced diffusion in metallic glasses, 267
Ductilization
structural modification and ductilization of a metallic glass by mechanical pulverization, 185

Electron microscopy
Brillouin scattering and transmission electron microscopy studies of radiation induced elastic softening, disordering and amorphization of intermetallic compounds, 231
high-resolution and *in situ* TEM studies of annealing of Ti–Si multilayers, 139
Extended X-ray absorption fine structure
RDF and EXAFS structural study of mechanically alloyed $Ni_{50}Ti_{50}$, 129

Formation enthalpies
diagrams of formation enthalpies of amorphous alloys in comparison with the crystalline solid solution, 299

Glass-forming ranges
glass-forming ranges of mechanically alloyed powders, 93
Granular system
amorphization by solid state diffusion in granular system, 49

High energy ball mill
development of an extremely high energy ball mill for solid state amorphizing transformations, 113

© Elsevier Sequoia/Printed in The Netherlands

Ice
amorphization of ice Ih by pressure at 77 K, 361
Icosahedral phases
solid state formation of icosahedral phases, 375
Intermetallics
amorphization by mechanical alloying: the role of mixtures by intermetallics, 73
Brillouin scattering and transmission electron microscopy studies of radiation induced elastic softening, disordering and amorphization of intermetallic compounds, 231
Inverse melting
thermodynamics of inverse melting, 327
Ion beam mixing
ion beam mixing and radiation enhanced diffusion in metallic glasses, 267
Iron
amorphization of Zr–Fe multilayers observed by *in situ* X-ray and magnetization measurements, 17

Kinetics
structure and transformation kinetics in spontaneously vitrified Cr–Ti alloys, 317

Low-angle X-ray diffraction
low-angle X-ray diffraction study of solid amorphization in an Ni/Ti multilayer, 33

Metallic glasses
crystallization of zirconium-based metallic glasses, 1
ion beam mixing and radiation enhanced diffusion in metallic glasses, 267
structural modification and ductilization of a metallic glass by mechanical pulverization, 185
Metastable phases
metastable phase equilibria and solid state amorphization, 287
metastable phase formation under irradiation, 211
thermodynamics of stable and metastable phases in the NiTi system and its application to amorphous phase formation, 335
Modelling
chemical short-range order in dense random-packed models, 385
modelling of irradiation-induced amorphization in a titanate ceramic, 255
Multilayers
differential scanning calorimetry studies of solid state amorphization in multilayer Ni/Zr, 353
low-angle X-ray diffraction study of solid amorphization in an Ni/Ti multilayer, 33
structure of early transition metal–late transition metal multilayers, 57

Nanometre-sized solids
nanometre-sized solids, their structure and properties, 161
Nickel
calorimetry study of the synthesis of amorphous Ni–Ti alloys by mechanical alloying, 171
differences in the amorphization reactions by mechanical alloying of Ni–Zr resulting from different ball-milling techniques, 119
differential scanning calorimetry studies of solid state amorphization in multilayer Ni/Zr, 353
diffusion studies in amorphous NiZr alloys and their relevance for solid state amorphizing reactions, 345
low-angle X-ray diffraction study of solid amorphization in an Ni/Ti multilayer, 33
RDF and EXAFS structural study of mechanically alloyed $Ni_{50}Ti_{50}$, 129
synthesis and process characterization of mechanically alloyed amorphous Ni–Nb powders, 85
thermodynamics of stable and metastable phases in the NiTi system and its application to amorphous phase formation, 335
Niobium
synthesis and process characterization of mechanically alloyed amorphous Ni–Nb powders, 85

Palladium
irradiation stability of Pd_2Si, 277

Radial distribution functions
RDF and EXAFS structural study of mechanically alloyed $Ni_{50}Ti_{50}$, 129

Silicon
high-resolution and *in situ* TEM studies of annealing of Ti–Si multilayers, 139
irradiation stability of Pd_2Si, 277
Stability
irradiation stability of Pd_2Si, 277
Stages in SSAT
early and late stages of solid state amorphization reactions, 25
Structural modification
structural modification and ductilization of a metallic glass by mechanical pulverization, 185
Synthesis
synthesis and characterization of mechanically alloyed Ni–Sn powders, 99
synthesis and process characterization of mechanically alloyed amorphous Ni–Nb powders, 85

Thermodynamic stability
thermodynamics of the stability of amorphous alloys of two transition metals, 307
Titanate ceramic
modelling of irradiation-induced amorphization in a titanate ceramic, 255
Titanium
calorimetry study of the synthesis of amorphous Ni–Ti alloys by mechanical alloying, 171
deformation-induced amorphization of $CuTi_2$ microcrystals in an amorphous matrix, 149
high-resolution and *in situ* TEM studies of annealing of Ti–Si multilayers, 139
low-angle X-ray diffraction study of solid amorphization in an Ni/Ti multilayer, 33
RDF and EXAFS structural study of mechanically alloyed $Ni_{50}Ti_{50}$, 129
structure and transformation kinetics in spontaneously vitrified Cr–Ti alloys, 317
thermodynamics of stable and metastable phases in the NiTi system and its application to amorphous phase formation, 335

Vitrification
computer simulation of defect-induced vitrification, 245

Zirconium
amorphization of Zr–Fe multilayers observed by *in situ* X-ray and magnetization measurements, 17
crystallization of zirconium-based metallic glasses, 1
differences in the amorphization reactions by mechanical alloying of Ni–Zr resulting from different ball-milling techniques, 119
differential scanning calorimetry studies of solid state amorphization in multilayer Ni/Zr, 353
diffusion studies in amorphous NiZr alloys and their relevance for solid state amorphizing reactions, 345
